

PAYMENT METHODS, APPARATUSES, AND DEVICES

ABSTRACT

Embodiments of this specification disclose payment methods, apparatuses, and devices. The solution includes: receiving a wake-up instruction, where a manner of initiating the wake-up
5 instruction includes: reading, by a mobile device in which the client is located, a short-range wireless communication tag of a payee to obtain a corresponding code value, sending the wake-up instruction to the client, and providing the code value; obtaining related information of the payee based on the code value in response to the wake-up instruction; in a case in which current payment belongs to large payment, triggering, based on the related information, a server of the
10 payment application to obtain a dynamic code of the payee and performing corresponding large payment processing based on the dynamic code of the payee; and receiving a payment result returned by the server.
