(54) Title: A NOVEL BOOK-LIKE INTERNET BROWSER FOR ELECTRONIC INFORMATION

(57) Abstract: A browsing interface for browsing Internet information that organizes information downloaded from the Internet in a page-based manner, complete with a functional thickness representation. A number of insertion methods are available for insertion of newly downloaded Internet information. A browsing data file contains information and parameters which control the display of information on the browsing interface. A streaming algorithm pre-downloads data based on predicted user data requests to minimize interruption of the browsing process.
