WO 2025/185139 A1

(54) **Title:** BIOMETRIC FEATURE RECOGNITION METHOD AND APPARATUS, COMPUTER DEVICE, AND STORAGE MEDIUM

(54) 发明名称: 生物特征识别方法、装置、计算机设备及存储介质

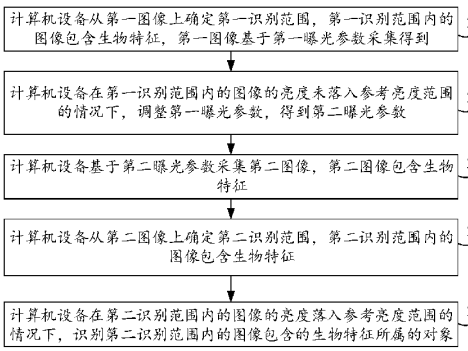

图 2

201 A computer device determines a first recognition range from a first image, wherein the image within the first recognition range comprises biometric features, and the first image is collected on the basis of a first exposure parameter

202 When the brightness of the image within the first recognition range does not fall within a reference brightness range, the computer device adjusts the first exposure parameter to obtain a second exposure parameter

203 The computer device collects a second image on the basis of the second exposure parameter, wherein the second image comprises the biometric features

204 The computer device determines a second recognition range from the second image, wherein the image within the second recognition range comprises the biometric features

205 When the brightness of the image within the second recognition range falls within the reference brightness range, the computer device recognizes an object to which the biometric features comprised in the image within the second recognition range belong

(57) **Abstract:** A biometric feature recognition method and apparatus, a computer device, and a storage medium, relating to the technical field of computers. The method comprises: determining a first recognition range from a first image (201); when the brightness of the image within the first recognition range does not fall within a reference brightness range, adjusting a first exposure parameter to obtain a second exposure parameter (202); collecting a second image on the basis of the second exposure parameter (203); determining a second recognition range from the second image (204); and when the brightness of the image within the second recognition range falls within the reference brightness range, recognizing an object to which biometric features comprised in the image within the second recognition range belong (205). The method, apparatus, device and storage medium provided in embodiments of the present application can ensure the accuracy and success rate of biometric feature recognition.

(57) 摘要: 生物特征识别方法、装置、计算机设备及存储介质，属于计算机技术领域。该方法包括：从第一图像上确定第一识别范围(201)；在第一识别范围内的图像的亮度未落入参考亮度范围的情况下，调整第一曝光参数，得到第二曝光参数(202)；基于第二曝光参数采集第二图像(203)；从第二图像上确定第二识别范围(204)；在第二识别范围内的图像的亮度落入参考亮度范围的情况下，识别第二识别范围内的图像包含的生物特征所属的对象(205)。本申请实施例提供的方法、装置、设备及存储介质，能够保证生物特征识别的准确性和成功率。
