DESCRIPTIVE ABSTRACT

G00002

BOX FOR STORING AND/OR PREPARING A LONG FISHING LINE

Dominique MICHON

The box includes means for storing fish hooks which consist on the one hand, - of a rack (36) in the form of a flexible incised band wherein are pinched the bottom of the branches (4) and, on the other hand - of an outer rack (32) which serves as a prop for the fish hooks (3), retaining them at their hooks or the knot (41) and, - of an inner rack (34) fitted with slots for housing the branches and protect them from the mother line (2) during spinning.

The storage means are in the form of rectilinear bars (10) for boxes made of a parallelepiped casing fitted with stanchions (6) at each of its angles.

According to an embodiment variation, the storage means are in the form of a crown forming the upper rim of a truncated box.
