(54) Title: CONTENT MANAGEMENT APPARATUS

(57) Abstract: There is disclosed an apparatus configured to provide a chart of content items to a plurality of user devices. The apparatus is configured to enable individual users to temporarily access one or more content items listed in the chart. The apparatus comprises a user device interface configured to communicate with user device applications and a permissions module configured to define user access permissions, including temporary user access permissions, relating to individual ones of the one or more items of content. The apparatus also provides a distribution module configured to implement permissions defined in the permission module in relation to user devices by making available one or more items of content listed in the chart to at least one user device application.
