

Abstract

The present invention relates to a Xanthine derivative as shown in formula (I),

Formula (I)

wherein,

R is selected from:

;

R¹ is selected from cyano or methoxycarbonyl;

R² is selected from hydrogen and halogen atoms, a linear or branched C₁₋₆ alkyl group which is substituted or unsubstituted by 1 to 5 halogen atoms, a linear or branched C₁₋₆ alkoxy group which is substituted or unsubstituted by 1 to 5 halogen atoms;

X and Y are each independently selected from C or N; and

n is 0, 1, 2, 3 or 4.
