

ABSTRACT

METHOD OF CLEANSING THE COLON

Method of cleansing the colon before a diagnostic, therapeutic or surgical procedure comprising: - administering an effective amount of a first colon cleansing solution; - administering an effective amount of a second colon cleansing solution, the second colon cleansing solution being as defined in the application; whereby the first colon cleansing solution is taken over a time period $t(d1)$ followed by optional additional clear fluid over a time period $t(cf1)$, and then following a time interval $t(\text{dose interval})$, the second colon cleansing solution is taken over a time period $t(d2)$ followed by optional additional clear fluid over a time period $t(cf2)$, whereby the subject undergoes the surgical, therapeutic or diagnostic procedure at a time $t2$ after the beginning of the colon cleansing method, and whereby the time interval after the completion of the second additional clear fluid and the start of the surgical, therapeutic or diagnostic procedure is $t(\text{procedure interval})$.
