(54) Title: A METHOD AND SYSTEM FOR CARRYING OUT TIMING RELATED TASKS

FIG 5

(57) Abstract: Embodiments of the present invention provide a method and system for timing related tasks in IoT systems, for example, in relation to synchronisation of clocks and timestamping. It is desirable that the method and system is able to withstand external tampering in a manner which does not jeopardise the accuracy and integrity of time related tasks in the IoT systems.
