

Abstract

The present disclosure provides a device control method and apparatus, a device, and a storage medium. The method comprises: in the running process of a target application program, if it is determined that device use time information of the current user meets a preset blocking trigger condition, displaying a preset blocking page on the current running interface of the target application program, wherein the preset blocking page is used for blocking a trigger operation for the current running interface, and an authentication control is provided on the preset blocking page; in response to a trigger operation for the authentication control, authenticating the current user; and once it is determined that the authentication of the current user succeeds, closing the preset blocking page.
