(54) Title: PALLET LEADER BOARD SYSTEM

Figure 1

(57) **Abstract:** The present invention provides a leader board unit for use with a four-way entry pallet, the pallet being of a type which includes a plurality of parallel transverse top boards supported by a plurality of upper support planks, the leader board unit including: a top leader board parallel to and of substantially the same length as the transverse top boards; a bottom leader board parallel to, spaced apart from, and of substantially the same length as the top leader board; a plurality of support members formed integrally with and perpendicular to the top and bottom leader boards and holding the two leader boards in their spaced-apart configuration, each support member including a protrusion for mounting a respective upper support plank, the leader boards and support members being structurally integral and formed of a plastics material.
