

A COATING PROCESS

ABSTRACT

A process for coating a hard disk housing component, the
5 process comprising the steps of:

dipping one or more hard disk housing
components in a curable coating bath; and

removing the components from said curable
coating bath to form a curable coating on the
10 surface of the components, wherein the orientation
of the coated components is such that the coating
drips from a single point of the component to allows
excess coating to drip therefrom and form a
substantially uniform coating thereon.
