

ABSTRACT

The present disclosure relates to a resource processing method and apparatus, and an electronic device, a storage medium and a program product, which can enrich the ways of gaining access to a live streaming viewing permission, thereby improving the user experience. The method comprises: displaying a resource transfer page for a target resource, wherein information of the target resource and information of a live streaming room corresponding to the information of the target resource are displayed on the resource transfer page; and in response to a resource transfer operation for the target resource, displaying information of successful resource transfer, so as to share the target resource, wherein the target resource is used by a target resource claiming object to gain corresponding access to the live streaming room when same has drawn the target resource.
