MULTIPLE MATERIAL GOLF CLUB HEAD

ABSTRACT

5 A fairway wood type golf club having a club head with a major body and a minor body is disclosed herein. The major body is composed of a metal material and has a striking plate section, a return section, a sole section, a ribbon section and a ledge portion. The minor body is preferably composed of a composite material and has a crown section and a ribbon section. The striking plate section preferably has variable face thickness. The minor body is preferably
10 attached by a liquid adhesive to the ledge section of the major body.
