

2 **WHAT IS CLAIMED IS:**

3 1. A user equipment (UE) comprising:
4 a processor; and
5 a memory in electronic communication with the processor, wherein instructions
6 stored in the memory are executable to:
7 receive a configuration of first resource pools; and
8 perform a sidelink communication using the first resource pools;
9 wherein:
10 the first resource pools consist of second resource pools and additional
11 resource pools, and
12 the second resource pools are available for UEs for which the additional
13 resource pools are not available.

1

1 2. A method for a user equipment (UE), the method comprising:
2 receiving a configuration of first resource pools; and
3 performing a sidelink communication using the first resource pools;
4 wherein
5 the first resource pools consist of second resource pools and additional
6 resource pools, and
7 the second resource pools are available for UEs for which the additional
8 resource pools are not available.
