

**SOFTGEL FORMULATION CONTAINING EDIBLE BIRD'S NEST AND METHOD
FOR PRODUCING THE SAME**

ABSTRACT

5

The present invention relates to a softgel formulation comprising polyethylene glycol, polyvinylpyrrolidone and an edible bird's nest extract. The formulation may further comprise resveratrol. The formulation may further include a surfactant to increase the bioavailability of the edible bird's nest extract and/or other ingredients or

10

excipients. The present invention also relates to a method for producing the softgel formulation.
