(54) Title: INTRAOCULAR LENS PERIPHERAL SURGICAL SYSTEMS

FIG. 3A

FIG. 3B

(57) Abstract: Peripheral surgical systems are used for insertion and filling of fluid-filled intraocular lenses (100), reaccessing and modifying fluid-filled intraocular lenses, and explantation of lenses (1504). Although one peripheral surgical unit may perform all of these functions, in some embodiments different units perform different functions - i.e., each function may be performed by a separate unit, or the functions may be distributed over a smaller number of functional units.
