(54) Title: COMMUNICATION METHODS AND COMMUNICATION DEVICES

FIG 2

(57) Abstract: According to various embodiments, a communication method may be provided. The communication method may include at least one of sending a data unit or receiving a data unit. The data unit may include or may be a poll type field indicating one of a plurality of requests from a mobile radio communication device to an access point with respect to at least one of transmission of buffered data from the access point to the mobile radio communication device or a timing of communication between the access point and the mobile radio communication device.
