(54) **Title:** METHODS OF TREATING TTP WITH IMMUNOGLOBULIN SINGLE VARIABLE DOMAINS AND USES THERE-
OF

(57) **Abstract:** The present invention is based on the finding that administration of polypeptides comprising at least one Immuno-
globulin single variable domains against vWF to human TTP patients provides a significant decrease in the time to response. The in-
vention provides a polypeptide comprising at least one immunoglobulin single variable domain (ISVD) against von Willebrand
Factor (vWF) for use in treating a vWF-related disease in a human in need thereof. The invention further relates to dosage unit
forms, kits and medical uses for treating TTP.
