ABSTRACT

SYSTEM FOR MANAGING TABLE GAME AND CARTON FOR DISCARD

There is provided a system for managing a table game in which management for which cards are certainly discarded after being used without being dispersed in a unit of packages in which they are packaged is realized in a unit for cartons for discard. The system for managing a table game according to the present invention stores information on carton IDs read by an ID card reader, and a moving apparatus (700) of the carton (600) for discard for accepting discarded cards (3) in different areas (600A) in a unit of packages is provided below an outlet (4) of a game table (2). The moving apparatus (700) is provided with an X-Y table (701) moving the carton (600) for discard in an X-Y direction (shown in Fig. 5), and the carton (600) for discard is mounted and fixed on the X-Y table (701).
