(54) **Title**: INFORMATION UPDATE SYSTEM

(54) 発明の名称 : 情報更新システム

[図1]

(57) **Abstract**: Disclosed are a novel information management program and system for mutually conveying information for which an information provider has restricted the audience of the disclosed information, for example, personal information such as contacts, or personal communication, and managing thereof. In a storage medium of a center system are stored, for each user, the user's personal information, contact list, and approved contact list as user information, and personal information of others as an approved contact personal information database. The information processing device, when one's personal information that has been stored in the storage medium is input or modified by the user, for each contact that has been registered in the contact list of the user, verifies whether or not the user has been registered as an approved contact in the approved contact list of the contact, and only for contacts for which the registration has been performed, automatically updates content of the approved contact personal information database of the contact by way of writing at least a portion of one's personal information that has been input or modified in the approved contact personal information database of the contact stored in the storage medium.
