

## SUMMARY

Wing-tip device for the tip of a wing or the blade of a  
5 wind generator or of a marine generator that makes it possible  
to reduce or even cancel what are known as wing-tip vortices. In  
the case of a wind generator, the result provides a start-up  
with less wind, control and energy efficiency that are highly  
productive throughout its use while at the same time  
10 significantly reducing the noise caused by the vortex.
