(54) Title: REMOTELY CONTROLLING PLAYBACK OF CONTENT STORED ON A DEVICE

(57) Abstract: A system, method, and computer-readable media are disclosed for remotely controlling playback of content stored on a device. The system, method, and computer-readable media can transmit state-based commands from a host unit to the device in order to control playback of the content. The host unit can control playback of the content without requiring the device to transfer the content to the host unit. The host unit can also be updated as soon as there is a change in any state of the device.
