

SIGNAL OR CHANNEL DETECTION METHOD AND APPARATUS, TERMINAL, AND STORAGE MEDIUM

ABSTRACT

The present application discloses a signal or channel detection method and apparatus, a terminal, and a storage medium, and is applied to a first terminal. The detection method comprises: determining a first signal of the first terminal or a first detection parameter of a first channel on the basis of a paging configuration parameter of the first terminal, wherein the first signal or the first channel is used to indicate whether the terminal detects paging.
