(54) Title: ADAPTOR FOR COUPLING WITH A MEDICAL CONTAINER

Fig. 8

(57) Abstract: The invention relates to an adaptor for coupling with a medical container closed by a septum, the adaptor comprising: - a gripping member (20) for securing the adaptor to the medical container, - a needle access port intended to face an outer surface of the septum, - a pierceable elastomeric piece (50) having a longitudinal axis located into the needle access port, said pierceable elastomeric piece having a recess (51) with a proximal opening and an outer wall (54) in contact with the needle access port, - attaching means for maintaining the elastomeric piece into the needle access port. The invention also relates to an assembly comprising such an adaptor and a medical container, and to the use of such an adaptor for preventing the contamination inside a medical container closed by a septum.
