

[Name of Document] Abstract

[Summary]

[Problem] The present invention is to provide a composition containing an oxidizing agent for use as a hair dyeing agent or a hair bleaching/destaining agent, wherein the formulation stability can be improved, and a method of using the same.

[Solution] The composition containing the oxidizing agent of the present invention is used as a hair dyeing agent or a hair bleaching/destaining agent in admixture with an agent containing an alkaline agent, wherein the compositions containing oxidizing agents contains (A) 4 mass % or more of a hydrocarbon in liquid form at 25 °C, (B) a non-ionic surfactant having an HLB of 8 or less, and (C) a higher alcohol. The component (B) may be at least one selected from monoglycerin fatty acid ester and polyglycerin fatty acid ester.
