TERMINAL DEVICE, DEVICE PROVIDED WITH PROSE FUNCTION, COMMUNICATION METHOD FOR TERMINAL DEVICE, AND COMMUNICATION METHOD FOR DEVICE PROVIDED WITH PROSE FUNCTION

Abstract

Provided is a communication system or the like in which a service based on ProSe is implemented under the management of a network operator. Processing based on a discovery request procedure for discovering a proximity terminal or being discovered is performed based on authentication of a server device operated by the network operator. In addition, the network operator updates the processing based on the discovery request procedure in accordance with a policy of the network operator.
