(54) Title: FIXING ASSEMBLY FOR FIXING ADDITIONAL LENSES, BINOCULAR LOUPES AND THE LIKE WITH SPECTACLES			
(57) Abstract			
The invention relates to a fixing assembly for attaching supplemental lenses, binocular loupes and the like to spectacles. The fixing assembly comprises a clip (6) which is tightenable by means of a screw (7) into the engagement with a bridge (3) connecting the rims of actual lenses across the nose. The clip (6) comprises a clamping hook (10) constituting a loop which grips around said bridge (3) and whose ends are received in a hole (11a, 11b) extending through a clip body (8, 9, 6b) and dimensioned relative to the screw (7) such that threads of the screw (7) engage with the clamping hook (10). Attachments (4; 18) are secured by way of thin arms (5; 20-26) to said clip (6) to which a yoke-like holder can also be fastened by means of a snap fit.
