(54) Title: IMMEDIATE RELEASE PH-INDEPENDENT SOLID DOSAGE FORM OF CISAPRIDE

(57) Abstract

The present invention concerns oral dosage forms of some particular salts of cisapride, more particularly cisapride-(L)-tartrate, cisapride-(D)-tartrate, cisapride-sulfate, or cisapride citrate, which avoid drugfood interaction and which allow comedication of agents that increase the pH of the stomach. The invention particularly relates to solid oral dosage forms suitable for rapid dissolution. The present invention also concerns tablets which can be prepared via direct compression.
