210 In a setting interface of media content, provide a plurality of entries used for setting a plurality of covers of the media content, the plurality of entries being associated with a plurality of cover ratios
220 In response to selection of a first entry among the plurality of entries, present an editing interface, the first entry corresponding to a first cover ratio
230 On the basis of an editing operation in the editing interface, generate a first cover corresponding to the first cover ratio
240 Based at least in part on the generated first cover, generate a second cover corresponding to a second cover ratio among the plurality of cover ratios

(57) Abstract: Embodiments of the present disclosure relate to a method and apparatus for setting a cover, and a device and a storage medium. The method provided in the present disclosure comprises: in a setting interface of media content, providing a plurality of entries used for setting a plurality of covers of the media content, the plurality of entries being associated with a plurality of cover ratios; in response to selection of a first entry among the plurality of entries, presenting an editing interface, the first entry corresponding to a first cover ratio; on the basis of an editing operation in the editing interface, generating a first cover corresponding to the first cover ratio; and based at least in part on the generated first cover, generating a second cover corresponding to a second cover ratio among the plurality of cover ratios. In this way, the embodiments of the present disclosure can support creation of a plurality of covers of different ratios for media content.
