ABSTRACT

REINFORCING BAR BINDING DEVICE

A binding mechanism that binds a binding section where a reinforcing bar extending in a first direction intersects with a reinforcing bar extending in a second direction that intersects with the first direction; a main body to which the binding mechanism is mounted; and a leg structure including a plurality of legs connected to the main body are included, and each of the plurality of legs includes a displacement mechanism configured to change a distance between the main body and a reinforcing bar in contact with the legs.
