(57) **Abstract:** Provided in the present disclosure are an event live-streaming method, apparatus and device and a storage medium. The method comprises: first, within a live-streaming window on an event live-streaming room page, and on the basis of a first live-streaming room, displaying a live-streaming picture of a target event; in response to a preset triggering operation for a target associated live-streaming room among at least one associated live-streaming room, switching from the first live-streaming room to the target associated live-streaming room, and, on the basis of the target associated live-streaming room, displaying the live-streaming picture of the target event; and simultaneously displaying within a preset window on the event live-streaming room page a live-streaming picture of the target associated live-streaming room. Therefore, by means of switching between the live-streaming rooms on the event live-streaming room page, the embodiments of the present disclosure can display on a same screen the live-streaming picture and a commentary picture of the target event, thus enriching display methods of the live-streaming picture of the target event and improving user experience.
