

**Title Of Invention: COMMUNICATION APPARATUS AND COMMUNICATION
METHOD FOR SIDELINK CO-CHANNEL COEXISTENCE RESOURCE
SELECTION INFORMATION SHARING**

ABSTRACT

The present disclosure provides a communication apparatus and a communication method for sidelink co-channel coexistence resource selection information sharing, the communication apparatus comprising: a first module, which, in operation, is configured to select a list of first resources from a first plurality of candidate resources based on information relating to one or more resources of a second plurality of candidate resources received from a second module; and a transceiver, which, in operation, transmits to and/or receive from another communication apparatus a signal in one of the list of first resources.
