(54) Title: PROTECTIVE DRAINAGE WRAPS

(57) Abstract: A protective drainage wrap (10) comprises a first portion (12) and a second portion (14). The first portion (12) comprises cross-woven or cross-laminate material in the machine direction (12a) and in the transverse direction (12b). The material in the machine direction (12a) comprises a polyolefin, polyester, nylon or combinations thereof and has a first thickness. The material in the transverse direction (12b) comprises a polyolefin, polyester, nylon or combinations thereof and has a second thickness. The second thickness is at least about 2 times greater than the first thickness so as to assist in providing drainage for moisture build-up. The second portion (14) is a coating comprising a polyolefin, polyester, nylon or combinations thereof. The first portion (12) and second portion (14) are located adjacent to each other. According to one embodiment, the material in the transverse direction (12b) is yarn.
