
MODEL OVERVIEW
Securities Finance Service Desk
Principal Lender
1. Sec Finance Principal Desk sends a report to IM showing securities available to borrow or IM will send in a locate file that SFP will respond to
2. Based on available securities to borrow IM identifies securities to short and sends trade order to SSGM. Upon execution SSGM sends trade details back to IM.
3. IM instructs State Street Custody to sell security.
3a. IM instructs Sec Finance Principal to borrow security
4. Sec Finance borrows securities from Agent Lender and delivers to IM's account in Custody.
5. Custody sends borrowed security to SSGM for trade settlement.
6. Custody maintains positions and delivers trade details to downstream systems.
