

Abstract

Nozzle tip adapter, nozzle assembly as well as nozzle

5 A nozzle tip adapter (12) has a suction duct (34), a supply duct (36), and a
base body (16) with a device end (18) and a substrate end (20). The base body
(16) has a nozzle tip recess (26) at its substrate end (20) for receiving a nozzle
tip (14) and a projecting portion (30) extending into the nozzle tip recess (26),
wherein the suction duct (34) extends through the projecting portion (30) and the
supply duct (36) opens into the nozzle tip recess (26), wherein the suction duct
10 (34) is being at least partially surrounded by the supply duct (36).

Further, a nozzle assembly (10) and a nozzle (60) are shown.
