(54) Title: POSITIONING AND/OR HOLDING A PLURALITY OF LINE SECTIONS OF ELECTRIC LINES ALONG A DRIVE WAY OF A VEHICLE

Fig.3

(57) Abstract: The invention relates to a shaped block (304) for positioning and/or holding a plurality of line sections (310) of one or more electric lines along the track of a vehicle, wherein the shaped block (304) comprises a plurality of recesses (315) and/or projections, wherein edges of the recesses (315) and/or the projections each delimit a space for the line sections (310) into which one of the line sections (310) can be introduced, so that said line section extends through the space in a longitudinal direction of the space, and wherein the longitudinal directions of the spaces delimited by the edges of the recesses (315) and/or by the projections extend essentially mutually parallel in a common plane.
