

ABSTRACT OF THE DISCLOSURE
METHOD FOR MANAGING AN ELECTRONIC MEDICAL RECORD AND
AN EMR MANAGEMENT SYSTEM

A method is for managing an electronic medical record
5 (EMR) entry which is to be written into a data storage
device possessed by a patient and includes generating
information associated with a health professional who
provides a health care service that results in the EMR
entry, and a location which is related to the health
10 care service, determining whether to permit writing of
the EMR entry into the data storage device according
to the information thus generated, determining whether
the patient agrees with writing of the EMR entry into
the data storage device according to input of the patient,
15 and writing the EMR entry into the data storage device
when writing of the EMR entry is permitted by the EMR
management system and is agreed upon by the patient.
