

CELL CULTURING METHOD USING NUCLEIC ACID-CONTAINING MEDIUM

ABSTRACT

An object of the present invention is to provide an animal cell culture method which is high in protein productivity.

Provided is a method for culturing animal cells in a culture medium, wherein the culture medium comprises a nucleic acid component(s) (deoxyuridine, thymidine, and/or deoxycytidine, or a salt(s) thereof). Also provided is a method for producing a protein, the method comprising the step of culturing animal cells expressing the protein in a culture medium, wherein the culture medium comprises a nucleic acid component(s).
