ABSTRACT

A pharmaceutical composition containing ([3'-desoxy-3'-oxo-MeBmt]^1-[Val]^2-Ciclosporin) as an active ingredient. The composition is formulated as a microemulsion or microemulsion preconcentrate using a carrier medium comprising a hydrophilic phase; a transesterified ethoxylated vegetable oil; and a surfactant. The composition has good stability and biopharmaceutical properties and is useful in the treatment of multiple drug resistance syndrome in humans.
