(54) Title: A PHARMACEUTICAL COMPOSITION CONTAINING N-CHLOROPHENYLCARBAMATES AND N-CHLOROPHENYLTHIOCARBAMATES FOR INHIBITING THE GROWTH OF VIRUSES AND CANCERS

(57) Abstract

This invention is a pharmaceutical composition that inhibits the growth of cancers and tumors in mammals, particularly in human and warm-blooded animals. The composition is also effective against viruses. The composition contains N-chlorophenylcarbamates and N-chlorophenylthiocarbamates which are systemic herbicides. The composition can also contain N-chlorophenylcarbamates and N-chlorophenylthiocarbamates along with a chemotherapeutic agent and optionally a potentiator. A composition for treating viral infections in animals or humans comprising a safe and effective amount of N-chlorophenylcarbamates and the N-chlorophenylthiocarbamates and a potentiator is also disclosed.
