(54) Title: A TRANSIT DEVICE AND SYSTEM FOR LEADING CABLES OR PIPES THROUGH A PARTITION AND USE THEREOF

Fig. 4

(57) Abstract: A transit device (10) for leading a cable (11) or a pipe through a partition (12), wherein the transit device comprises a frame (16), a compression unit (17) and a compression screw (18) for operating the compression unit, wherein the compression screw extends through an aperture (25) in a wall of the frame. The frame comprises a guiding surface (27) to guide the compression unit (17) when operated by the compression screw (18). The transit device further comprises an angle element (33) having a first plate portion (34) and a second plate portion (35), wherein the first plate portion comprises a through hole (36) for the compression screw (18), and wherein the second plate portion (35) engages the compression unit (17) to guide the compression unit when operated by the compression screw (18).
