

Ref. 20'028

Abstract

5 The novel N-(4-carbamimidophenylamino)phenyl-
glycineamide derivatives of the formula

10 in which E, G¹, G², Q, R and X¹ to X⁴ are each as defined in
the description, and hydrates or solvates and physiologically
acceptable salts thereof can be used as inhibitors of the
formation of the coagulation factors Xa, IXa and thrombin
induced by the factor VIIa and by the tissue factor,
15 specifically as medicaments for the treatment and/or
prevention of thromboses, apoplexy, cardiac infarction,
inflammation and arteriosclerosis or as antitumour agents.
