(54) Title: CONTROLLER FOR PORTABLE ELECTRONIC DEVICE

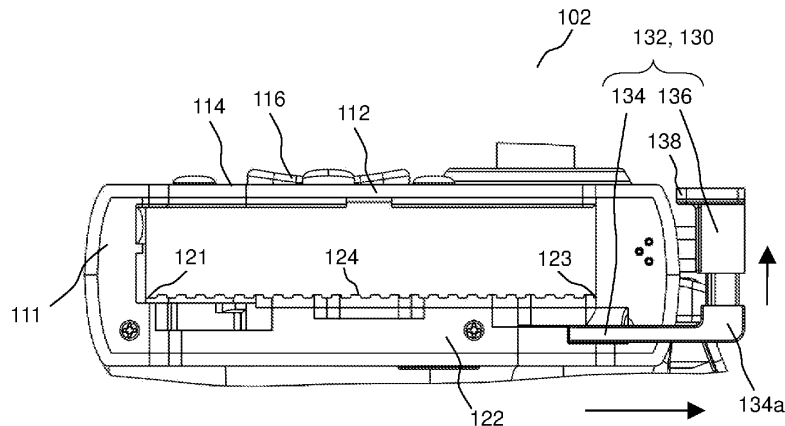

FIG. 2C

(57) Abstract: A controller including a controller body with a main body portion and a support-panel portion extending sideways from the main body portion. The support-panel portion has a backing-surface with an edge segment demarcating a boundary between the main body portion and the support-panel portion. The controller including an extension unit slidably with respect to the support-panel portion along a sliding axis parallel to the backing-surface. The extension unit including an extension arm, and a stopper member at an outer end of the extension arm. The extension arm is retractably extendable from the support-panel portion along the sliding axis. The stopper member is retractably extendable from the outer end of the extension arm along an extension axis perpendicular to the backing surface. The stopper member including an overhang portion. The stopper member operable to clamp the portable electronic device along a thickness direction of the portable electronic device.
