(54) Title: DISINFECTION DEVICE AND SYSTEM FOR PLACEMENT IN OR NEAR A HEAT EXCHANGER UNIT

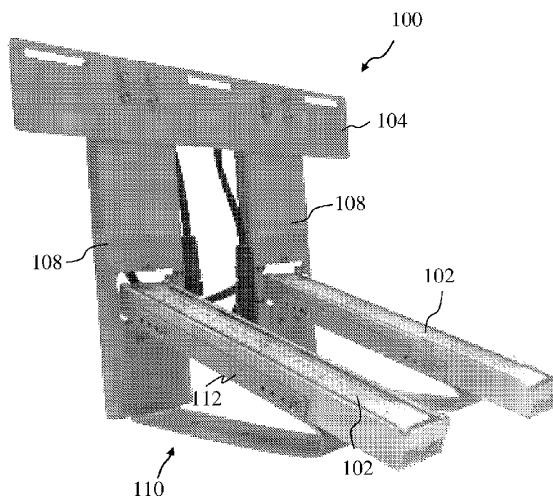

FIG. 1A

(57) Abstract: The disclosure relates to a disinfection module for placement in, or in the proximity of, a heat exchanger unit, the disinfection module comprising at least one disinfection source, the at least one disinfection source configured to emit an electromagnetic radiation; an attachment plate for attachment to a portion of the heat exchanger unit; and at least one disinfection source receiver configured to receive the at least one disinfection source; the at least one disinfection source receiver comprises a first portion extending from the attachment plate, and a second portion for receiving the at least one disinfection source; wherein the second portion is removably attached to the first portion and protrudes from the first portion at an angle, the second portion orientated in a manner such that the at least one disinfection source emit the electromagnetic radiation toward a surface of the heat exchanger unit.
