(54) Title: BLOCKCHAIN-BASED TRUSTED PLATFORM

FIG. 3

(57) Abstract: Disclosed herein are methods, systems, and apparatus, including computer programs encoded on computer storage media, for maintaining data in a blockchain-based trusted system. One of the methods includes receiving data by a service computer system from a client device. The service computer system generates ledger data based on the data, and sends the ledger data to the blockchain-based trusted system. A credential corresponding to the ledger data is received by the service computer system from the blockchain-based trusted system. The service computer system sends the credential to the client device.
