(54) Title: NON-INTEGRATED CATHETER SYSTEM HAVING AN EXTENSION SET

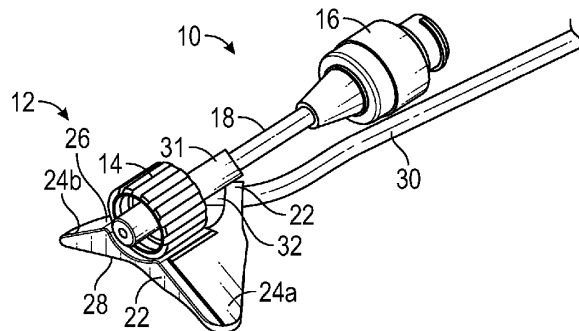

FIG. 1A

(57) Abstract: A catheter system may include a catheter adapter, which may include a distal end and a proximal end aligned with the distal end. The catheter system may include a catheter extending from the distal end of the catheter adapter. The catheter system may include an extension set, which may include a distal end, which may include a first connector coupled to the proximal end of the catheter adapter. The extension set may include a second connector and an extension tube disposed between the first connector and the second connector. The catheter, the catheter adapter, the first connector, the extension tube, and the second connector may be in fluid communication. The catheter system may include a stabilization platform disposed below the first connector.
