Abstract

Luggage or container with casters comprising a braking device and a plurality of pivoting wheels

Luggage (1) or container with casters (2) comprising a braking device and a plurality of pivoting wheels (2). The braking device comprises a means (3) of manual control acting on at least one Bowden cable (4) passing through at least one flexible tensioning sheath (5, 6) and acting at each end on a means of actuating braking of the pivoting wheel mounted in a housing (8) attached to a pivoting axis of the pivoting wheel (2). The manual control means (3) exhibits a first button, the so-called “activation button” (3a), and a second button, the so-called “deactivation button” (3b).
