INFORMATION PROCESSING METHOD, INFORMATION PROCESSING APPARATUS, AND STORAGE MEDIUM FOR STORING AN INFORMATION PROCESSING PROGRAM

ABSTRACT

To provide a server for offering centralized service with respect to a dialog between a plurality of browsers and a Web server, thereby to change content of service offered to the browsers without changing the server.

In a domain name server (130), a plurality of virtual host names and their common IP address are managed. When a Web browser (100) sends a request by specifying this virtual host name, a server having the common IP address is rendered to offer centralized service. For a request that does not require any service, this request is transferred to actual Web servers (151 to 157) corresponding to the virtual host name.
