(54) Title: INFUSION DEVICE FOR PREPARING BEVERAGES USING INSOLUBLE MATERIAL

Fig. 1A

(57) Abstract: The present invention relates to an infusion device (10) for preparing beverages using insoluble material, comprising a vessel (12) for receiving the beverage and the insoluble material having an open end (26) and a closed end (28) and defining an axis (X), and a piston-filter assembly (30) insertable into the vessel (12) via the open end (26) and movable towards the closed end (28) along the axis (X), the piston-filter assembly (30) comprising a filter element (36) and a sealing section (38), wherein the sealing section (38) encloses the filter element (36) radially outwardly with reference to the axis (X) and seals the piston-filter assembly (30) against the vessel (12), and comprises a first sealing gasket (46) and a second sealing gasket (48) being arranged spaced from each other with reference to the axis (X).
