(54) Title: CLAMPING DEVICE, TOOL AND METHOD OF MOUNTING TOOLS ✓

(57) Abstract

The invention relates to a device for clamping at least two tool parts movable relative to each other for processing carriers for electronic components in a press. The invention also relates to a press adapted for co-action with the clamping device. The invention also describes a tool part and a tool assembled from tool parts and adapted for co-action with the clamping device. Finally, the invention also relates to a method for mounting a tool in a press.
